CATEGORY

Performing Arts

Quickly move these sturdy risers from practice room to concert stage.

When it comes to versatility, the Z-support system is hard to match. The StageRight Z-support system can be configured as seating risers, speaker platforms, choral risers, theater stages, show-choir risers, head table risers, fashion show runways, and band risers - all using the same decks and Z-supports. You'll minimize your initial investment because

you can use the same support system for a wide variety of staging needs. Assembly is as easy as unfolding the one-piece support to form a "Z" shape, and placing the deck on it. No tools are required. Diagonal bracing on taller supports, provide stability so the platform won't creak or sway.

→ Set-up simply involves unfolding the support and placing a deck on it.

Set up in minutes

Sturdy, with no tools required

Unsurpassed customer service

Z-80 Choral/Band Riser Package

Features and Benefits

Multiple Configurations

- Arrange different layouts to suit various events.
- Minimize your initial investment and storage space requirements because there is no need to buy and store separate staging systems for several types of events.

One-Piece Support

- Save time and labor with fast, simple setup and storage.
- Minimize storage space requirements.
- Waste no time looking for tools or assembling loose parts.

Horizontal and Diagonal Bracing

- Enhance performances with stable platform (no swaying or creaking).
- Feel like you are on a permanent platform.

Safety-Fold Support

- Avoid accidents: With the deck in place, the Z-leg cannot accidentally fold or collapse during use.

Tapered Locator Nodes

- Save setup time because decks align and secure quickly and without tools.

Technical Specifications

Function Portable risers or staging shall accommodate a wide variety of events.

Supports Z-support shall be a one-piece construction and unfold in "Z" shape to accept StageRight Decks. Support shall, without tools, fold compactly for storage.

Bracing Support shall be braced horizontally to reduce swaying and creaking. Additional lateral stability shall be provided by diagonal bracing for heights of 24" and up.

Locator Nodes Conical nodes shall guide the decks into location and proper alignment, securing them in place without tools or clamps.

Construction Braces shall be 1" square or 1" x 2" rectangular 14-gauge steel. Outer legs shall be 1 1/2" OD 14-gauge steel tube; inner legs shall be 1 1/4" OD 14-gauge steel tube. Each support shall have two 17" straps to connect it to adjoining units. Each strap shall be made of 2" nylon webbing with hook-and-loop Velcro™ (except the 8" tall Z-80 Support shall have 1" wide webbing). All steel components shall be finished with a black baked-on powder-coated finish. On variable-height models, spacer buttons on the telescopic legs shall eliminate metal-to-metal contact. On the Z-80 only, the foot cap shall be made of non-marring Dupont Zytel™.

Options

Accommodate Deck sizes:

4' x 8', 4' x 6', 4' x 4', 3' x 8', 3' x 6'
